« We represent quality and expertise. Since 1919, we have been investing in the development and innovation of high-tech products. We also have high standards in terms of sustainability and great respect for human health and the health of our environment. »

Daniel MAULER, grandson of the company founder

WOOD TREATMENTS AND SPECIALIST PAINTS SINCE 1919

MAULER is an owner-managed, family-run company based in Alsace, France. Since 1919, we have been developing, manufacturing and selling high-quality, environmentally friendly products for the protection and styling of wood and other materials for indoor and outdoor use.

For three generations, we have been investing all of our energy in the creation and innovation of high-tech products such as paints, varnishes, oils, glazes and waxes for wood, as well as complementary and specialist products for a huge variety of substrates.

We continue to develop our products with the greatest respect for your health and the environment. Innovations and laboratory research are the guarantees for our high-quality, sustainable and uniquely textured, easy-to-use

products. We make high-tech's leading edge user-friendly and suitable for daily life.

MAULER was one of the first companies in the industry to receive the European EU Ecolabel, the internationally recognised EU symbol, for some of its products. And we are continually working towards increasing this number.

All stages of the manufacture of our products reflect our passion for protecting the environment. For over 20 years now, the family-run company has been using renewable raw materials, committed to reducing emissions and minimising its use of harmful chemicals.

For us, high-tech doesn't have to mean high-priced. We believe in high quality for reasonable prices – for professionals and for the DIYer.

PERFECT ADHESION

FOR ALL SUBSTRATES

NO PRIMERS NECESSARY

NO SANDING NECESSARY

NO LIMIT MULTI-PURPOSE PAINT®

NO LIMIT MULTI-PURPOSE PAINT® is the revolutionary solution for updating old furniture, even entire kitchens, wall tiles, panels and work surfaces. Easy to apply with a brush or roller, No Limit is suitable for all substrates from varnished, treated or painted wood to synthetic surfaces, wall tiles and even metal.

Even without sanding or priming, No Limit provides perfect adhesion to a wide range of surfaces and protects against stains and scratches.

Water-based **NO LIMIT MULTI-PURPOSE PAINT®** is suitable for use on children's toys in accordance with the European EN 71-3 standard, is odourless and available in a range of colours including the Effects concrete, rust and patina (in bronze, platinum and copper), as well as three pigmentable bases.

TIP: For surfaces that are subject to particular wear, such as worktops, we recommend additional protection in the form of **TOTAL RESIST VARNISH** (see p. 9).

Our **NO LIMIT MULTI-PURPOSE PAINT®** has been awarded indoor air quality category A+ in accordance with the mandatory French emission classification system.

PAINTING OVER KITCHENS, DOORS AND FURNITURE WITHOUT STRIPPING, SANDING OR PRIMING IT AND WITHOUT BEING FAMILIAR WITH THE VARIOUS MATERIALS? THINK IT'S IMPOSSIBLE?

Apply **POWER CLEANER** followed by **NO LIMIT MULTI-PURPOSE PAINT** and see for yourself. Imagine giving your kitchen a makeover without having to take off the handles or buy different products for your worktops, wall tiles and furniture. With the easy-to-apply **NO LIMIT MULTI-PURPOSE PAINT**, this dream of easy renovations can be made a reality. **NO LIMIT MULTI-PURPOSE PAINT** is also durable, protects against stains and scratches and is suitable for children's toys.

For even better protection, choose our single-component, odourless **TOTAL RESIST VARNISH**. It makes doors and work surfaces hard wearing and resistant to oil, wine and coffee stains.

For people who love a patina in copper, bronze or platinum, or even a rust or concrete look, we can offer easy product solutions with our **NO LIMIT MULTI-PURPOSE PAINT**

EFFECTS. With just a few brushstrokes, you can conjure up a realistic patina, rust or a concrete look.

If you want to imitate realistic metallic effects indoors or outdoors, it's easy with our **METAL EFFECT PAINT** in gold, silver or aluminium tones. And if you want to achieve a realistic rust effect on any surface, including outdoors, while protecting from actual rust, we have the **RUST EFFECT PAINT**, just for you.

Our product range for easy renovation work is rounded off with the naturally odourless **WOOD PAINT GLAZE**, which bears the EU Ecolabel and is suitable for use on children's toys, and our **ANTI-RUST METAL COATING** water-based anti-corrosion paint.

NO LIMIT MULTI-PURPOSE PAINT® RUST EFFECT

NO LIMIT MULTI-PURPOSE PAINT®

Rust Effect is delivered pre-mixed to the right colour. Two steps are all you need to achieve the desired effect: Firstly, the surface needs to be covered with the base colour. The finish is then applied perpendicular to the brushstrokes or stippled, depending on what kind of rust look you want to achieve.

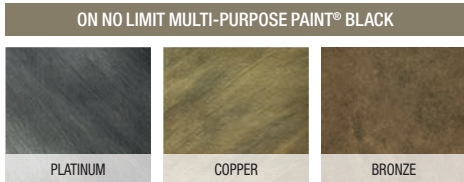

NO LIMIT MULTI-PURPOSE PAINT® CONCRETE EFFECT

Base colour and finish are combined to create the perfect concrete effect with great durability. Simply apply an even coat of the base colour and add the finish with a roller or stipple it on with a sponge until you achieve the desired effect. Impressive and unique effects are guaranteed, thanks to the individual application.

NO LIMIT MULTI-PURPOSE PAINT® PATINA EFFECT

NO LIMIT MULTI-PURPOSE PAINT® Patina Effect is suitable for all substrates and is available in three shades. As a finish applied to NO LIMIT MULTI-PURPOSE PAINT®, it is possible to achieve original and individual effects. Simply apply it with a roller, brush or sponge – either with or without a stencil. The three shades of platinum, copper and bronze can be combined perfectly with the darker NO LIMIT MULTI-PURPOSE PAINT® base tones. It is also suitable as a finish on the base tones of the Rust or Concrete Effect Paints for special effects, guaranteed.

IMPORTANT: The final result always depends on the substrate, its colour, the application and the number of coats applied.

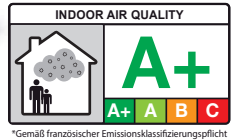

CROSSLINKING TECHNOLOGY

EXTREMELY HARD-WEARING

ODOURLESS

TOTAL RESIST VARNISH

Unique crosslinking technology makes **TOTAL RESIST VARNISH** one of the best single-component varnishes on the market. Specially developed for renovating furniture, banisters or indoor cladding of any kind, **TOTAL RESIST VARNISH** is ideal as a finish for our **NO LIMIT MULTI-PURPOSE PAINT**. One coat of this ready-to-use, odourless and water-based varnish is enough to lend the **NO LIMIT MULTI-PURPOSE PAINT** an exceptionally hard-wearing finish. The renovated surface will acquire a waxed look and remain protected against coffee, wine, alcohol and even grease stains over the long term. The clear varnish is also available with a delicate frost or glitter effect. Our **TOTAL RESIST VARNISH** is particularly suitable for use on surfaces subject to extreme wear. Easy to apply with a brush or roller, the clear varnish will make the paint layer extremely shock resistant and protect it from wear and scratches. **TOTAL RESIST VARNISH** has been awarded indoor air quality category **A+** in accordance with the mandatory French emission classification system.

CROSSLINKING TECHNOLOGY

NO PRIMERS NECESSARY

DOES NOT YELLOW WITH TIME

MINIMISES DIRT

NO LIMIT ANTI-STATIC RADIATOR PAINT

NO LIMIT ANTI-STATIC RADIATOR PAINT will turn your radiators into decorative highlights.

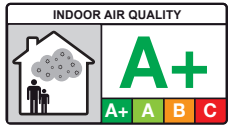

The water-based radiator paint is easy to use and suitable for painted or powder-coated radiators and heating systems (e.g. steel and copper pipes). It is heat resistant to 80 °C. Designed to withstand high temperatures, **NO LIMIT ANTI-STATIC RADIATOR PAINT** does not soften or yellow with time and does not crack. It is anti-static, helping to minimise dirt and repel dust. The paint is hard wearing, protects the radiator and is very resistant to stains and scratches. Thanks to its ultra-strong adhesion, no primer is necessary. We recommend first simply degreasing the surface using our **POWER CLEANER**.

Our **NO LIMIT ANTI-STATIC RADIATOR PAINT** is odourless and has been awarded indoor air quality category **A+** in accordance with the mandatory French emission classification system. It is available in white with a wax look, as well as in three pigmentable bases for limitless design possibilities.

ODOURLESS

WOOD PAINT GLAZE

Our **WOOD PAINT GLAZE** is ideal for protecting all wooden furniture, doors and indoor wooden cladding. The water-based paint glaze is odourless and certified for use on children's toys under **EU STANDARD EN 71-3**. The **WOOD PAINT GLAZE**, which bears the ecolabel of the European Union, repels water, alcohol and detergents, does not yellow and is highly shock resistant. The glaze is easy to use, durable and maintains the natural colour of the wood. **WOOD PAINT GLAZE** is available in six shades including clear, and in glossy, silky-matt and matt.

TWO-PHASE PRODUCT
PRIMER AND FINISH
DECORATIVE PAINT WITH RUST EFFECT
FOR ALL SUBSTRATES
FOR INDOOR AND OUTDOOR USE

RUST EFFECT PAINT

RUST EFFECT PAINT comprises two products: the primer and the finish, for a perfect rust effect. No matter whether you use it on wood, plastic or metal, the two-phase **RUST EFFECT PAINT** lends a huge range of indoor and outdoor materials an incredibly realistic rust look. The primer and finish can be applied using a brush, roller or spray gun. For a perfect rust effect, we recommend stippling the finish with a brush. For outdoor use, we recommend two coats of primer – no additional rust protection is necessary.

METAL EFFECT PAINT

METAL EFFECT PAINT is a ready-to-use paint available in gold, silver or aluminium. The innovative formula of this polyurethane emulsion paint lends wood, plastic and metal an incredibly realistic metal look. **METAL EFFECT PAINT** is an easy-to-use, odourless and solvent-free topcoat that is suitable for use either indoor or out. Depending on the substrate, pre-treatment or priming may be recommended. The highly resistant **METAL EFFECT PAINT** replaces classic gold plating or silver plating of fences, wall decorations or furniture and guarantees perfect protection and great coverage. **METAL EFFECT PAINT** has been awarded indoor air quality category **A+** in accordance with the mandatory French emission classification system.

ANTIRUST METAL COATING

ANTI-RUST METAL COATING permanently protects metal, copper or brass outdoors against environmental influences, rust and UV. The colourless and odourless water-based metal coating is easy to use, fast-drying and does not yellow over time. The innovative formula with carefully selected resins guarantees perfect adhesion. Highly effective additives protect against corrosion. **ANTI-RUST METAL COATING** surrounds the metal with a perfectly isolating layer, thus preventing oxidation.

GLOSSY CLEAR

Parquet & WOODEN FLOORS

WANT TO GIVE YOUR PARQUET FLOOR OR STAIRS A NEW SHEEN? MAULER PRODUCTS MAKE IT AS EASY AS 1-2-3. OUR PRODUCTS ARE NOT ONLY OF EXCEPTIONALLY HIGH QUALITY BUT ALSO HARMLESS TO HEALTH AND ENVIRONMENTALLY FRIENDLY.

Our product range for parquet and wooden floors includes a range of easy-to-use and specialist products for all types of redesign, reconditioning or renovation. Discover a new look for your floors, stairs, banisters and much more.

ELEGANT AND AS GOOD AS NEW WITH OUR PARQUET SEALANT: awarded the EU Ecolabel, the water-based sealant fulfils the requirements for European standard EN 71-3 for safety in children's toys and even absorbs harmful formaldehyde from a room. It is completely harmless, improves the indoor air quality and offers exceptional protection against scratches, wear and stains.

For people who prefer a matt finish, we recommend our odourless **CRYSTAL MATT PARQUET SEALANT** with its ultra-matt crystal finish..

INVISIBLE WOOD TREATMENT: Our **PARQUET OIL** leaves a clear, invisible finish on untreated parquet floors. Its water-based

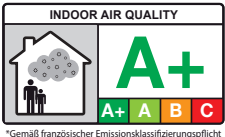

oil formula nourishes and protects the wood and is certified for use on children's toys.

A COMPLETELY NEW LOOK: Our **NO LIMIT PARQUET PAINT** makes it easy to renovate stairs, sealed solid-wood parquet floors or even laminate flooring. For a complete makeover with high-coverage colours – without stripping, sanding or priming, in no time at all. **NO LIMIT PARQUET PAINT** is easy to use and saves valuable time.

NATURAL STAINING: With our **WOOD STAIN 2-IN-1**, it's easy to add a splash of natural colour to your home. Our **WOOD STAIN** is both primer and stain combined, saving you time and money.

All the products in our range are odourless, easy to use, high-tech and subject to ongoing improvements. Supplementary products such as the **POWER WAX REMOVER**, **POWER CLEANER** and **PARQUET PRIMER** make life a little easier, even during highly complex renovation projects.

AND PARQUET

SUITABLE FOR WOODEN FURNITURE,
CHILDREN'S TOYS AND STAIRS

ODOURLESS

WOOD STAIN 2-IN-1

Our **WOOD STAIN 2-IN-1** contains both primer and stain in one and is suitable for all untreated wood parquet floors and products prior to sealing. As the only parquet wood stain on the market to date, the wood can be finished straight away, including with water-based products. No additional primer is required. The **WOOD STAIN** is available in nine shades, making it the ideal pre-treatment for parquet floors, but also for furniture, stairs and other wood products for indoor use. The odourless stain is absorbed easily, provides exceptional adhesion, dries quickly and is light resistant. It stains and primes the wood, but does not cause the wood fibres to swell, unlike most other stains on the market. The water-based formula is certified for use on children's toys under EU standard EN 71-3, ready to use and does away with hard primers for water-based parquet sealants. Our **WOOD STAIN** has been awarded indoor air quality category **A+** in accordance with the mandatory French emission classification system.

IMPORTANT: The final result always depends on the substrate, its colour, the application and the number of coats applied.

ULTRA MATT

INVISIBLE FINISH

ODOURLESS

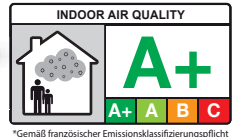

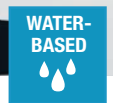

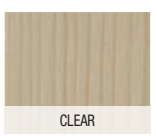

NON-GREASY

PARQUET OIL

Our **PARQUET OIL** is an easy way to treat wooden floors, cladding and furniture for indoor use. The coats can be applied one after the other without waiting for them to dry, which makes it quick to treat the parquet without any residue.

The water-based oil formula is completely odourless and certified for use on children's toys under EU standard EN 71-3. The **PARQUET OIL** is absorbed deep into the wood, making it water resistant and dirt repellent and protecting it effectively against scratches, wear and stains.

PARQUET OIL maintains the natural colour of the wood and does not leave behind an oily film. It is suitable for all untreated parquet floors, wooden floorboards, stairs, wooden furniture or children's toys and can also be used for stained or heat-treated woods and cork.

HIGH-COVERAGE
PARQUET PAINT

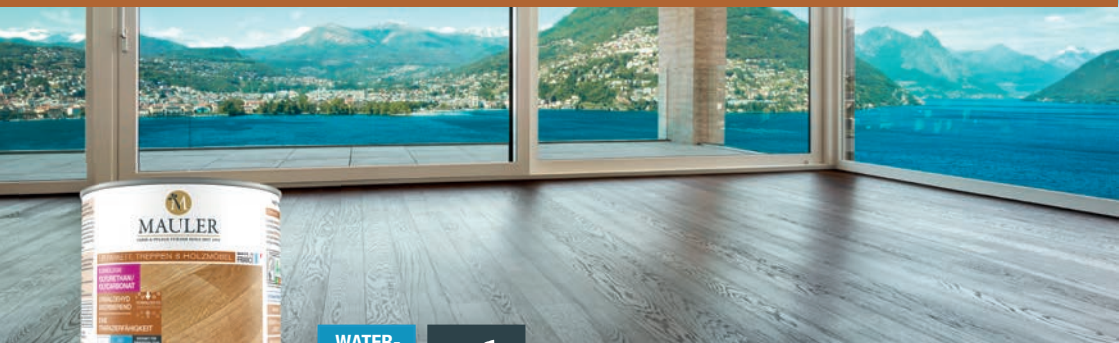

FOR PARQUET AND
LAMINATE FLOORS

NO PRIMERS NECESSARY

NO LIMIT PARQUET PAINT

NO LIMIT PARQUET PAINT is the ideal solution for giving your old parquet or laminate floor or your wooden stairs a new look. The odourless, high-coverage parquet paint will adhere to even old surfaces, making it easy to renovate without the need for priming or sanding. The renovated surface will be impact resistant and shockproof, easy to clean and dirt repellent. The water-based paint is ready to use and available in various grey, black and white tones, as well as three pigmentable bases. Our **NO LIMIT PARQUET PAINT** has been awarded indoor air quality category **A+** in accordance with the mandatory French emission classification system.

POWER CLEANER

Our **POWER CLEANER** is ideal for easy, efficient cleaning of even heavily soiled furniture, stairs and floors, as well as sealed parquet, synthetic floors and floorboards, sealed cork, painted concrete and laminate.

The emission-free, water-based cleaner degreases and cleans even hardened residues and removes even splashes of paint after just a short application time. Even several layers of parquet oil, for example, can be removed with no effort at all.

The freshly scented **POWER CLEANER** was specially developed for preparing furniture, flooring and stairs for subsequent applications of **NO LIMIT MULTI-PURPOSE PAINT** and **NO LIMIT PARQUET PAINT**. The **POWER CLEANER** is more than just a cleaning agent – it even does away with the need to sand, particularly parquet flooring, making it the ideal pretreatment for any renovation project.

CONCRETE PRIMER

Water-based **CONCRETE PRIMER** is suitable for all mineral substrates. It hardens the surfaces from below and isolates the substrate. It is designed as the ideal complement to **NO LIMIT PARQUET PAINT** and can be used as the primer for the **PARQUET SEALANT OR WOOD STAIN 2-IN-1**.

The deep-action acrylic primer is suitable for waxed concrete, putty concrete, float-finished concrete, ultra-thin concrete or self-levelling concrete. It can be applied to anhydrite screed, walls, floors, worktops, sinks and bathroom furniture.

The **CONCRETE PRIMER** is clear and easy to use. Simply apply with a brush or microfibre/foam roller.

Our **CONCRETE PRIMER** is odourless and has been awarded indoor air quality category **A+** in accordance with the mandatory French emission classification system..

*Wooden
facades*
AND CLADDING

WE LOVE WOOD. THAT'S WHY WE WANT TO PROTECT IT. THE PRODUCTS IN OUR WOODEN FACADES AND CLADDING RANGE HAVE BEEN CERTIFIED FOR OUTDOOR USE AND OFFER GREAT RESISTANCE TO ALL WEATHERS AND UV LIGHT. THE ENTIRE RANGE IS ENVIRONMENTALLY FRIENDLY AND EASY TO USE.

Our flagship product, **FLEMISH OIL**, is a high-solid product with a solids content of over 90%. The oil, made from natural raw materials, offers exceptionally long-lasting and effective protection, even under the most extreme weather conditions.

Looking for a clear, lasting, water-based finish? Then try our two-phase product, **UV-STOP EXTREME WOOD PRIMER OUTDOOR** in combination with **COLOURLESS PROTECTION**.

And if you would prefer to maintain the naturally matt appearance of your wood and freshen up its colour a bit, the easy-to-apply **TINTED OIL FOR WOODEN FACADES**

with its natural matt finish is just the thing you need.

If you prefer natural products, our **OUTDOOR WOOD OIL** is the right choice for you. Not only is it environmentally friendly, durable and easy to use, it has a very high proportion of natural oils.

Our classic product – the highly durable, odourless **SEA & MOUNTAIN EXTREME VARNISH** – completes our range for wooden facades and cladding.

FLEMISH OIL®

We are particularly proud of our **FLEMISH OIL®**. Comprising more than one third natural oils and Kieselguhr extracts, our **FLEMISH OIL®** contains over 80% natural raw materials. The development of our **FLEMISH OIL®** was inspired by Flemish seafarers, who traditionally used a highly effective blend of resins to maintain the wooden decks of their ships.

The formula of our **FLEMISH OIL®** guarantees the highest protection for all untreated woods outdoors, including under the most extreme conditions, such as by the sea or in the mountains. The solids content of over 90% makes the oil a particularly silky and innovative high-solid product. It provides wood with lasting protection even under extreme weather conditions, high UV exposure and large temperature variations.

FLEMISH OIL® is certified to European standard EN 927-6. This standardised weathering test guarantees the unaltered state of the wood after at least 2,000 hours under extreme weather conditions (by comparison: European Ecolabel requires 500 hours).

PRIMING AND UV PROTECTION
FOR OUTDOOR WOOD

OUTDOOR WOOD OIL

OUTDOOR WOOD OIL is a wood treatment based on natural plant oils and resins. Our **OUTDOOR WOOD OIL** protects all woods for outdoor use, including heat-treated woods. The oil is absorbed deep into the wood and protects it from within. With over 90% natural oils in the protective film and its effective anti-UV formula, it effectively protects wood against extreme weather and makes it more durable.

Suitable for wood cladding, facades and balconies, **OUTDOOR WOOD OIL** is also available in nine natural shades for softwood floors, heat-treated and exotic woods.

Our **OUTDOOR WOOD OIL** has been certified to European standard EN 927-6: after a weathering test of at least 500 hours under extreme conditions, the protective film remains undamaged and therefore guarantees that the wood remains intact and unchanged.

PIGMENTABLE SILVER BASE

IMPORTANT: The final result always depends on the substrate, its colour, the application and the number of coats applied.

SEA & MOUNTAIN EXTREME VARNISH

SEA & MOUNTAIN EXTREME VARNISH, which has been awarded the EU's Ecolabel, is particularly well suited to wood that is exposed to damp weather conditions and high UV exposure. The water-based varnish is odourless and was specially developed for use in extreme maritime or mountain climates.

The clear **SEA & MOUNTAIN EXTREME VARNISH** is suitable for all types of wood that are exposed to extreme conditions outdoors, including window shutters, wood cladding, balconies or garden furniture. The varnish is available in semi-matt or gloss.

Its excellent adhesion and innovative formula with UV absorbers and radical scavengers protect the wood over the long term and make it weatherproof and UV resistant. The gel formula also makes it easy to work with, leaving a perfect surface finish.

Our **SEA & MOUNTAIN EXTREME VARNISH** has been certified to European standard EN 927-6: after a weathering test of at least 1,000 hours under extreme conditions, the protective film remains undamaged and therefore guarantees that the wood remains intact and unchanged.

- DEEP ACTION AND PROTECTION FOR OUTDOOR WOOD
- GEL FORMULA
- TWO UV PROTECTION ADDITIVES
- ODOURLESS

TINTED OIL FOR WOODEN FACADES

The deep-action, water-based **TINTED OIL FOR WOODEN FACADES** protects and adds colour to wooden facades, cladding, fences or window frames, as well as all vertical timbers outdoors.

Thanks to its gel formula, the silky and odourless oil is easy to work with and penetrates deep into the wood. Not one but two anti-UV additives effectively protect the wood from UV radiation and make it more durable.

The ready-to-use **TINTED OIL FOR WOODEN FACADES** is available in eight shades and maintains the natural grain and matt look of the wood.

Suitable for all untreated woods, light-coloured woods, resinous wood and hardwoods, as well as exotic and heat-treated woods for outdoor use. Not suitable for flooring.

IMPORTANT: The final result always depends on the substrate, its colour, the application and the number of coats applied.

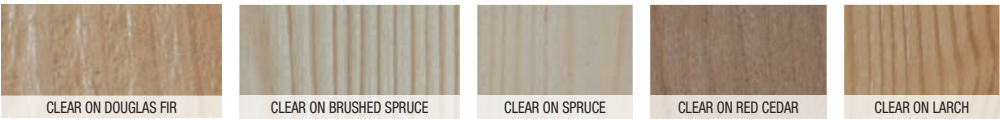

- PHASE 1
- FOR EXTREME WEATHER CONDITIONS
- WOOD PROTECTION
- ODOURLESS

UV-STOP EXTREME WOOD PRIMER OUTDOOR

UV-STOP EXTREME WOOD PRIMER OUTDOOR was developed especially for outdoor wood that is subject to extreme weather conditions. The two-phase product must be supplemented by the **DECKING & FLOOR PROTECTOR** for wooden flooring and **COLOURLESS PROTECTION** for wooden cladding.

The primer can also be used in combination with the **ANTI-SLIP DECKING STAIN**. Suitable for wood that is subject to tough conditions outdoors, the odourless coating penetrates deep into the wood in phase 1, reacting with the fibres so that it can combine with the product in phase 2 to develop an effective protective film that shields the wood from external influences. The protective film prevents greying, yellowing and the breakdown of wood fibres by water or UV rays.

In combination with the phase 2 product, our **UV-STOP EXTREME WOOD PRIMER OUTDOOR** has been certified to European standard EN 927-6: after a weathering test of at least 2,000 hours under extreme conditions, the protective film remains undamaged and therefore guarantees that the wood remains intact and unchanged (by way of comparison: EU Ecolabel requires at least 1,000 hours).

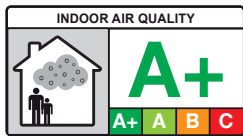

- PHASE 2
- SUPPLEMENT FOR UV-STOP PHASE 1
- UV-STOP EXTREME WOOD PRIMER OUTDOOR

COLOURLESS PROTECTION

The **PHASE 2 COLOURLESS PROTECTION** is the supplement to **UV-STOP EXTREME WOOD PRIMER OUTDOOR**. The odourless and completely clear glaze is applied after the treatment with **UV-STOP EXTREME WOOD PRIMER** and thus creates an effective protective film to shield the wood from external influences.

Suitable for all, including brushed, untreated woods, particularly light woods, softwoods and exotic woods used outdoors (e.g. cladding, balustrades or fences), this two-phase product combats greying, yellowing and the breakdown of the wood fibres by water and UV light. **COLOURLESS PROTECTION** contains two innovative light stabilisers and UV absorbers that protect from UV radiation, significantly extending the life of your wood when used in combination with the phase 1 primer.

In combination with the phase 1 product, our **COLOURLESS PROTECTION** has been certified to European standard EN 927-6: after a weathering test of at least 2,000 hours under extreme conditions, the protective film remains undamaged and therefore guarantees that the wood remains intact and unchanged (by way of comparison: the EU Ecolabel requires at least 1,000 hours).

DURABLE PROFESSIONAL PROTECTIVE GLAZE

DURABLE PROFESSIONAL PROTECTIVE GLAZE is our best solution for protecting woods used outdoors and in. With its complex emulsion of alkyd and acrylic resins, the **DURABLE PROFESSIONAL PROTECTIVE GLAZE** combines the qualities of both types of resin in a single glaze.

Awarded the EU's Ecolabel, **DURABLE PROFESSIONAL PROTECTIVE GLAZE** offers exceptional water-repelling properties: The water simply pearls on the surface of the wood without spreading out.

The special texture of the water-based **DURABLE PROFESSIONAL PROTECTIVE GLAZE** prevents smears and makes all woods for outdoor use highly durable. The glaze is suitable for chalets, fences, doors, window shutters, railings, facades, interior furnishings and garden furniture, as well as wooden bathroom furniture.

DURABLE PROFESSIONAL PROTECTIVE GLAZE is odourless, extremely flexible, does not yellow with time, does not flake or bubble and has been awarded indoor air quality category **A+** in accordance with the mandatory French emission classification system.

It is available in ten shades and also in clear for interior use. Our professional glaze is also certified to European standard EN 927-6. This standardised weathering test guarantees the unaltered state of the wood after at least 1,000 hours under extreme weather conditions.

IMPORTANT: The final result always depends on the substrate, its colour, the application and the number of coats applied.

OF WOOD

WOOD LIGHTENER

POWERFUL GEL FORMULA TO LIGHTEN WOOD

The powerful gel formula of our **WOOD LIGHTENER** brightens worn, grey wood indoors or out and reliably removes rust stains, ink, wine and even tannin, as well as grey patches.

The ready-to-use **WOOD LIGHTENER** is odourless, colourless and does not drip. It is suitable for untreated woods and all wood that has darkened or become stained, even restoring stained or green concrete or other floor materials made from acid-resistant stone.

WATER-BASED

REMOVES OIL RESIDUE

REMOVES DIRT

DEGREASES NEW, RESINOUS WOODS

MADE FROM 98% NATURAL RAW MATERIALS

BIODEGRADABLE

BASIC WOOD CLEANER

The **BASIC WOOD CLEANER** effortlessly cleans all wood surfaces outdoors. It loosens dirt and even removes oil residues. The odourless cleaner is ideal for the regular maintenance of all woods used outdoors, such as decking, cladding, swimming pool copings and wood elements of all kinds. Thanks to its unique formula, it can also be used for preparing and degreasing new, resinous or exotic woods. Not only that, but the **BASIC WOOD CLEANER** is also made from 98% natural raw materials and is easily and quickly biodegradable. With its water-based formula, which doesn't contain any solvents, the highly effective cleaner is not detrimental to either the material or the environment.

MAULER OFFERS AN EASY-TO-USE, ENVIRONMENTALLY FRIENDLY AND DURABLE PRODUCT FOR DECKING AND FLOORING MADE FROM ANY WOOD.

The **WOOD SATURATOR WITH PEARLING EFFECT** is the latest addition to our product range. With the **WOOD SATURATOR**, you can provide any type of wood, including new and untreated wood, with lasting protection after just one coat. What used to be unthinkable has now been made possible by the latest technology.

Do your children cut their knees on the slippery deck or the edge of the paddling pool when it rains or when they have too much fun splashing around? That doesn't have to be the case. Our **EASY-TO-APPLY ANTI-SLIP DECKING STAIN** can help. The efficient non-slip coating for outdoor use has been tested under wet conditions to European standard EN 13036-4.

For an even and highly durable finish for your decking and flooring, we recommend our two-phase product: Simply apply **UV-STOP EXTREME WOOD PRIMER FOR OUTDOOR USE**, followed by **DECKING & FLOOR PROTECTOR**. Your wood is then perfectly shielded from the weather and UV rays.

The perfect pretreatment for wooden floors, which are exposed to difficult conditions, is provided by our **WOOD LIGHTENER** and our **BASE COAT FOR TANNIN AND EXOTIC WOODS**.

And the best thing is that all of these highly effective products are water-based, harmless to health and environmentally friendly.

BASE COAT FOR TANNIN AND EXOTIC WOODS

The ready-to-use **BASE COAT** has been specially formulated for isolating and preparing tannin-rich and resinous woods, as well as exotic woods, before applying alkyd paints or glazes.

The water-based **BASE COAT** is odourless, clear and absolutely resistant to the oil and resins primarily found in exotic, tannin-rich woods and softwoods.

The special base coat is particularly well suited for outdoor applications, including the preparation of decking, wooden cladding or garden furniture made from tannin-rich, exotic, resinous or oily woods such as oak, chestnut, teak, iroko or softwoods.

UV PROTECTION

ODOURLESS

DECKING & FLOOR PROTECTOR

The phase 2 **DECKING & FLOOR PROTECTOR** is the supplement to **UV-STOP EXTREME WOOD PRIMER OUTDOOR**. The semi-matt protector with pearling effect is applied after the treatment with **UV-STOP EXTREME WOOD PRIMER** and thus creates an effective protective film to shield the wood from external influences.

The water-based protector triples the length of protection provided by the **UV-STOP PRIMER** and is suitable for all untreated, softwoods and exotic woods in outdoor use as decking or wooden flooring.

The **DECKING & FLOOR PROTECTOR** is odourless and maintains the natural colour of the wood. The two-phase product penetrates deep into the wood fibres and protects them against greying, yellowing and damage by water and UV rays thanks to its breathable film.

CLEAR

IMPORTANT: The final result always depends on the substrate, its colour, the application and the number of coats applied.

PERMANENT PROTECTION

WOOD SATURATOR WITH PEARLING EFFECT

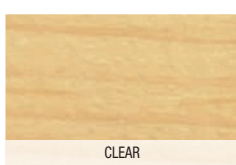

The water-based **WOOD SATURATOR WITH PEARLING EFFECT** is the ideal way to protect wooden decking and all other woods in outdoor use.

The innovative **WOOD SATURATOR** technology with UV protection additives and a high oil content offers permanent protection and a highly visible pearling effect.

A single coat is all it takes to permanently protect all types of wood – even wood that is poorly suited to impregnation – from damage by water and inclement weather.

The water-based, ready-to-use **WOOD SATURATOR WITH PEARLING EFFECT** is available in three colours, as well as clear.

The Wood Saturator prevents moss, stains and dirt and does not form a film on the surface.

ANTI-SLIP DECKING STAIN

Our **ANTI-SLIP DECKING STAIN** lends wooden decking, stairs and swimming pool copings improved grip and skid resistance thanks to its special non-slip formula with polypropylene microbeads. The **ANTI-SLIP DECKING STAIN** has been specially developed for wood in outdoor use, such as swimming pool copings and stairs. The skid resistance in wet conditions has been certified to European standard EN 13036-4.

ANTI-SLIP DECKING STAIN reduces wear, increases the wood's dirt-repellent and scratch-resistant properties, and protects it from the weather. The glaze has a silky-matt effect and is available in clear, as well as in four wood tones. To ensure the best anti-slip effect with normal use, we recommend thorough cleaning annually.
